

Tetiana Taranushchenko

Frontend Developer

Frontend Developer with **4 years** of hands-on experience building reliable, scalable, and user-centric product features. Strong proficiency in **React and TypeScript**, working on enterprise-level interfaces, architecture improvements, UI performance optimization, and testing. Combines solid technical skills with structured, product-oriented thinking, strong ownership, and a focus on delivering high-quality results aligned with business and UX goals.

WORK EXPERIENCE

Software Developer, Netminds

April 2026 - Present | Full-time | Ukraine

Recruitment / HRTech SaaS Platform

- Delivered frontend features for a recruitment SaaS platform supporting end-to-end hiring workflows, including job creation, candidate management, application forms, questionnaires, and job templates.
- Built React, TypeScript, and Redux solutions focused on product usability, UI consistency, and stability across key recruitment flows.
- Strengthened product quality from implementation to QA validation through UI fixes, unit tests, code reviews, and close collaboration with PM, backend, design, and QA.
- Leveraged AI-assisted development tools to streamline workflows, support testing, and improve code quality.

Software Developer, Edvantis

June 2022 – March 2026 | Full-time | Ukraine

Blue Yonder (Enterprise SaaS Platform (Supply Chain & Analytics))

- Developed and evolved enterprise-level UI features, including dynamic filters, analytical dashboards, and virtualized data lists for large datasets.
- Built scalable, maintainable frontend architecture through refactoring, performance optimizations, and clean code practices.
- Ensured high product stability by contributing to unit, integration, and E2E testing, resulting in an ~20% reduction in UI regressions.
- Worked in a cross-functional product team to translate business requirements into reliable, user-focused solutions aligned with UX goals and delivery priorities.
- Participated in requirement analysis, technical planning, documentation creation, and effort estimation across feature development cycles.

TrustRadius (B2B SaaS Platform (Software Reviews & Buyer Decision Support))

- Contributed to a B2B SaaS platform for reviews, working on buyer and vendor-facing flows with a focus on usability and data consistency
- Implemented and refined UI logic for complex scenarios, including conditional rendering, dynamic states, and edge-case handling.
- Translated product requirements into reliable frontend solutions, ensuring consistent behavior and quality with cross-functional teams.

Educational Background

Master's degree, Computer and Information Sciences

National Technical University, 2009 - 2011

Bachelor's Degree, Mathematics and Computer Science

State Pedagogical University, 2000 - 2005

Courses

GoIT (Full Stack Developer)

(Professional Training & Project Work)

November 2020 – February 2022

SoftServe (JavaScript Course)

June 2022 – August 2022

Languages

Ukrainian - native

English - Upper-intermediate

Skills

Frontend:

- React
- TypeScript
- JavaScript
- Next.js
- HTML/CSS
- Redux, React Query, RTK Query
- API Integration (REST, Axios)
- Microfrontend architecture
- Performance optimization

Testing:

Unit & Integration:

- Jest
- React Testing Library

E2E Automation:

- WebdriverIO
- Playwright

UI & Design Systems:

- Design Systems (usage & contribution)
- Component Libraries (Material UI; BYX UI Library)
- Tailwind CSS
- Styled Components
- Storybook
- Figma

Tools

- Git, GitHub, GitHub Enterprise
- GitHub Actions (CI/CD)
- Webpack, Vite
- Chrome DevTools
- Jira / Confluence
- AI-assisted tools (GitHub Copilot, ChatGPT, Claude Code)

Backend (Basic):

- Node.js
- Express
- MongoDB
- Postman

Soft skills

- Collaboration & teamwork
- Cross-functional communication
- Problem-solving & critical thinking
- Ownership & proactivity
- Detail-oriented & quality-focused
